COMPASS ORGANISOR

Presented By Mark Lewis

ELEVATOR PITCH

Managing volunteers brings its own challenges.

Variety of skills

Variety of time available

Often tasks fall back to the leaders to complete.

Therefore, Volunteer Organisations such as Scout Groups need a better way to manage people in their teams.

CONCEPT

A management application to help organise events and distribute tasks evenly within a volunteer organisation.

An opt-in task list that provides users with tasks based on their skills and available time.

Giving each user buy-in.

A central system of information to improve communication

USER STORY

AS A group leader of a scout group,
I WANT A system that allows me to oversee and manage the tasks or running a scout group
SO THAT I can ensure my group is moving forward instead of being tied to old fragmented systems

PROCESS

- **Technologies used**
  - Node.js, Express, React, MongoDB, Mongoose ODM, GraphQl, Semantic UI
- **Dependencies**:
  - Apollo, jwt-decode, vite, bycryte.

- CHALLENGES
- SUCCESSES
